What is it? A program developed by Centers for Medicare and Medicaid Services (CMS) to randomly audit claims monthly to determine if they processed correctly. Contractors then use this information to determine the cause of errors working to resolve them.

Why does it matter? To protect the Medicare trust fund and determine error rates nationally and regionally. The error rate assists CMS in determining a contractor's future so it is important for Novitas Solutions to educate our customers about proper billing techniques.

Who is involved? You. A request for medical records from AdvanceMed alerts you that one of your claims has been selected as part of the monthly random sample. If you have a specific contact that you would like to receive requests, please make this known by [visiting the CERT Provider Web site](#).

How does it work? A letter will be sent to your office requesting the medical documentation. You need to comply in a timely manner with the request. No response or sending in only part of the requested documentation will result in a CERT denial and a refund of monies previously paid.

CERT MAC Jurisdiction Definitions:

Jurisdiction 12 (J12): Delaware, Maryland, New Jersey, Pennsylvania, Washington, D.C.

Jurisdiction H (JH): Arkansas, Colorado, Louisiana, Mississippi, New Mexico, Oklahoma, Texas, Indian Health Service(IHS)/Tribal/Urban Indian and Veterans Affairs Providers
